Dear Sir/Madam:

I am a resident of Diamond Lake, Washington and a concerned member of the Diamond Lake Improvement Association. I am aware of our association's attempt to install a boat wash at the undeveloped parking lot across the street and at the top of the boat launch. I am in complete support of this endeavor. I understand that the Washington Department of Fish & Wildlife gave their permission for DLIA to establish a boat wash and then they withdrew their permission in July.

I am requesting reconsideration of this bad decision. I ask that you use your influence to help us in protecting our lake from invasive species like milfoil and quagga/zebra mussels. I am very concerned with the contamination of our lake and the loss of all the recreational activities and wildlife. This should be a great concern to this state. It should also be the County and State's concern that due to the devaluation of my property, when this happens, tax revenue will be considerably diminished as a result.

Please give this your immediate attention and contact anyone that you know who can assist DLIA in this crucial undertaking. I sincerely appreciate your help in keeping Diamond Lake water free from aquatic invasive species.

Sincereley,
